Basic Climbing Class (BCC) Fitness Evaluation

The “Fitness Evaluation” is exactly that: an evaluation, not a test or race. It is a timed event and it is expected that you will climb to the top as quickly as possible.

*****A Discover Pass is required for parking*** [Purchase your Discover pass here](#)**

Purpose

The Fitness Evaluation is designed to help better balance the BCC teams with a range of fitness levels. This will help all students to receive a nearly identical mountaineering learning experience regardless of team. Additionally, it will give you an evaluation of your own fitness before the class starts, and an idea of the exertion expected on the class outings.

Description

The Mount Si trail is 4 miles each way with about 3,100 feet of elevation gain. We will hike to the standard trail end, based on weather and snow levels. We will not attempt to climb the rocks or the haystack on the top.

You will check in at the trailhead, again at the top of the trail, and check out when you return to the trailhead. You will be carrying a 20lb pack that will be weighed at the trailhead before you start the hike and again at the top of the hike. You can reduce your weight once you have weighed in at the top.

Note: Use water bottles to bring your pack weight to 20lbs, and bring a few extras to leave in your car. Yes, you can drink the water while hiking and dump extra water out when you get to the top.

Time / Schedule

Check in from 6:45AM to 8:00 AM depending on the time assigned to you from your application. Finish time will depend on how long it takes you to complete the round trip.

Please see the BOEALPS BCC calendar for the date of the Fitness Evaluation

Prerequisites

Hiking ability, with possible snow or icy travel on the trail

Gear

Discover Pass for the parking lot

14 Jan 2018

- backpack weighing in at 20 lbs
